

4-H & Farm Safety Workshop.... a great Success!

The second annual “Agriculture Safety Day” was held at the Windsor exhibition grounds for 4-H members from the Western, South Shore and Valley regions. The day was devoted to increasing the knowledge and awareness of safety every day through fun activities.

Members learned about fire safety from the Windsor Fire Department as members explored a fire truck and they practiced tractor signals while exploring a tractor from Green Diamond Equipment. They also learned how to properly wash their hands using a special blue light to see the “germs” still on their and about sun safety from the Canadian Cancer Society. Chemical and animal safety were also covered and members got a chance to wear some chainsaw pants as they learned about woodsmen safety. Thank you to Carl Palmer and Loretta Schurman from Nova Scotia Farm Safety who helped organize the successful event. The day ensured lots of fun for the members but also stressed the importance of being safe in whatever you do.
