# Accidental Harvest 2009

Wildlife Resources Card No. (9 digits) \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_ Date \_\_\_\_\_

Species	Location	Time of Day	Date	Signature	Received by

It is recommended that you keep this form in a waterproof container, such as a Zip lock bag, along with your licenses, to keep it clean and dry. **See reverse for more information.**

# 2009 Accidental Harvest Form

When a trapper catches an animal to which he/she is not entitled (i.e. animals over your legal bag limit or those which are completely protected or for which the season is closed) the trapper is left with three options.

1. The first is to release the animal alive back into the wild.
2. The second would be to leave the animal at the trap site until such time that the Department of Natural Resources has been notified and direction received from DNR staff as to how to handle the animal in question (outside of normal DNR office hours, you may contact 1-800-565-2224).
3. The third alternative available to trappers is to complete a copy of the Accidental Harvest Form which is part of this card. This form must be completed at the trap site, prior to taking possession of and transporting any animal taken to which you are not entitled. If you catch more than one such animal (even on the same day), each animal must be recorded as a separate entry. Upon arriving at your place of residence you must report your catch to a DNR office, either the local Area office or, if outside normal office hours, the toll free number (1-800-565-2224). When calling you should report what you have in your possession, time of day, date and location of capture.

Once a trapper uses the form and has notified a DNR office that an animal has been taken and the form completed, arrangements need to be made to deliver the animal to a local DNR Area office. At the time of delivery, a DNR staff person will sign in the space provided under the column marked 'Received by' to acknowledge having taken possession of the animal/s. Department staff will ensure that all regular carcass information is obtained and the appropriate metal tag is attached.

Any species which are inadvertently caught and recorded on this form must still be reported in the appropriate column on the Furharvester Report Form (found in the 2009 Nova Scotia Hunting and Furharvesting Licence and Summary of Regulations booklet and/or on the DNR website), which all furharvesters must submit following the end of the furharvesting season.
