

# NOTICE

## Vegetation Management Program

As part of a management program to improve the growth of the regenerating forest, approximately 123 hectares of forest land in Cumberland County will be treated by ground application with the federally registered herbicide Vision (PCP# 19899) or VisionMax (PCP# 27736). The treatment will be done under approval from the Department of Environment. The areas involved are on Crown land near Maloney Road, Eatonville, Conns Mills, Thomson Station and Lower Wentworth. All sites will be posted.

The treatment will occur on or after August 26, 2009. For additional information contact the local Department of Natural Resources office.
