

To premier Rodney Mac Donald,

Dear Sir,

I intend to have a careful look at the consultation paper and send you feedback.

Before I start however I would like to make 2 comments:

I like to express my relief (and gratitude) that at least in Nova Scotia we are not intending to cheat the rest of the world and will stick to our Kyoto commitment.

Concerning the next goal, I hope that the way to measure our 'economical performance' will not be with outdated gnp ideology, but with newly developed indices reflecting environmental, health and other 'hidden' aspects of our total economy.

Sincerely,

Nistal Prem de Boer
