To whom it may concern,

My name is Darlene Savage. I currently reside in Digby NS. I am very aware of the dangers concerning the environment and our health that we, as people, have implemented on ourselves. I do want to change the world and there views on climate change, Health issues, and Pollution, but being only one person in a bigger picture is quite intimidating. But at least we have a voice!! Which leads me to my email....

I was watching the Mercer Report on CBC last week. He reported in one section of his show the ZENN Car (Zero Emmission No Noise). It is manufactured in St. Jerome, Quebec, but sold in the United States because our government has not approved it. It saves 6 tons of Carbon Immisions per year...which coinsides with the Kyoto Accord. It has zero gas immision, zero noise, and is quite reasonable in price. It is completely electric, you just plug it in a normal wall jack. Since this broadcast I have thought very severly about this vehicle and would love to own one, not only to better myself but to better the environment. I thinks these cars would definitely help our cause, not only for our pockets but for planet earth. All Nova Scotia needs to do, (actually all of canada), is approve it for our roads.

If you would like to see this video go to [www.cbc.ca/mercerreport/backissues.php](http://www.cbc.ca/mercerreport/backissues.php) from there it is the 7th episode from Nov.20th,2007.

Thank you for you time and support,

Sincerely,

Darlene M Savage
