

## Coastal Management Framework

The CMF defines the Government of Nova Scotia's overall vision for coastal management, and identifies a suite of strategic activities for achieving this vision.

While each activity is distinct; they are complementary, interconnected and designed to work in concert.

### Strategic Activities:

- Coastal Web Portal
- Public Education and Awareness
- Coastal Research Network
- Establish a Memorandum of Understanding with the Federal Government on Coastal Management
- LIDAR mapping
- **Sustainable Coastal Development strategy** →

## Sustainable Coastal Development Strategy

The first step in this process will involve developing the ***State of Nova Scotia's Coast Report***, which will set the context and scope for actions and recommendations to be identified in the Sustainable Development Strategy.

Work to develop both the State of Nova Scotia's Coast Report and the Sustainable Coastal Development Strategy, will be supported by concurrent efforts to develop the other strategic activities identified in the Coastal Management Framework.
