

Turning off Pop-Up Blockers in Google Toolbar (v4)

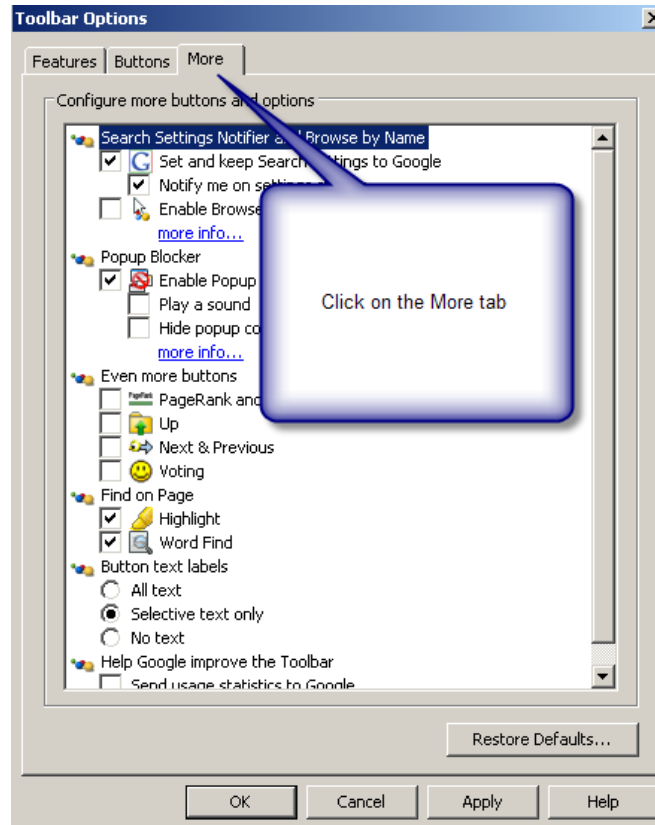

for using in
Nova Scotia Maps

If you use Internet Explorer and have the Google Toolbar installed, it likely has its pop-up blocker enabled. To allow Pop-ups, follow these instructions

Step 1. Go to the Google Menu in the Google Toolbar. This is normally found at the far right of the Google Toolbar. A single click displays a drop-down menu: select *Options*.

Step 2. Click on the *More* tab.

Step 3. Uncheck the *Enable Popup Blocker* button and click *Ok*.
