## **BLOOD GLUCOSE MONITORING STRIPS**

Bulletin Volume 10-02

February 2010

There are tough decisions being reviewed in the lead up to and following our provincial budget and there will be some difficult decisions made to live within our means.

That being said, the decision to limit access to glucose testing supplies had not been taken. Unfortunately, communications was made in error based on one of the various options being reviewed.

Any final decision will only be made after an appropriate review of all available information. This will involve consultations with stakeholders at various levels.

We would ask your co-operation in advising Pharmacare beneficiaries of the current position.

We regret that this option was released as a decision by the department.
