

Immunization protects

Immunization protects **everyone** against many diseases, such as:

- Diphtheria
- Whooping Cough
- Tetanus
- Polio
- Haemophilus Influenzae type b
- Pneumococcal pneumonia
- Chickenpox
- Meningococcal group C meningitis
- Measles
- Mumps
- Rubella
- Influenza
- Hepatitis B
- Human papillomavirus (HPV)

Are you up to date? Ask your family doctor or local Public Health Services office about immunization for you and your family.
