

Release 3.4.4

Release Notes for External Users

LaMPSS Release 3.4.4 includes enhancements to support more modern browsers and improvements to External Case Management outcome tracking. The LaMPSS technologies that are used for reports have also been upgraded.

Support for Modern Browsers

- **LaMPSS supporting modern browsers.** This includes MS Edge, Google Chrome, Firefox and Safari. MS Internet Explorer will no longer be supported, and issues may arise if MS Internet Explorer is used (TFS 29906).

External Case Management (ECM)

- **RTW Outcomes** – Additional data validation to support more accurate and timely recording of outcomes (TFS 30111):
 - Implemented a validation rule to ensure Case Managers can enter and complete an additional outcome “version” of the same outcome type within a 30-day grace period following the completion of the initial outcome; and
 - Implemented a validation rule to ensure a ‘RTWAP Closure’ outcome is not entered after a ‘24 Week’ outcome has been completed.

LaMPSS Report Technologies Upgrade

- **All Reports** – The technologies used for LaMPSS reports have been upgraded to their latest versions. The reports will produce the same results, but the interface “look” is slightly different (TFS 29827).
