

Release 3.5.1

Release Notes for External Users

LaMPSS Release 3.5.1 is implementing an automated interface between NS Works Online and LaMPSS to accept the NS Works Digital Intake Form that was implemented earlier this year.

External Case Management (ECM)

In March of this year, Employment Nova Scotia introduced a new “NS Works Digital Intake Form” on their NS Works Online web site. This form has replaced the current paper form that was previously used by clients visiting NS Works service providers. Clients can complete and submit this “online” form on the NS Works Online web site. This current release introduces an automated interface between NS Works Online and LaMPSS to process this digital form. LaMPSS Form Submission functions will also be implemented to help NS Works staff triage the forms received and automatically create ECM cases using the information on the digital form.

These LaMPSS enhancements have been implemented:

- **Automated Interface to process NS Works Digital Form** - New automated interface between NS Works Online and LaMPSS to process the NS Works Digital form and automatically create LaMPSS form submissions (TFS 29933).
- **Form Submission functions** – Configuration of the LaMPSS Form Submission screens to allow NS Works staff to triage and process the NS Works Digital forms received for their organization via the automated interfaces. This includes the following functions:
 - Form Submission Search (TFS 29936)
 - Form Submission Detail (TFS 29937)
 - Form Submission Person Search (TFS 29938)
 - Automated Creation of Case (TFS 29934)
- **Automated Interface to provide status back to NS Works Online** - New automated interface to provide status of the LaMPSS client, their form submission and case to the NS Works Online platform (TFS 29935).
