

ACKNOWLEDGMENTS

The author thanks Deborah Skilliter, Vincent DeWolfe and Darren Lynch for their assistance during the field work. Special thanks to Richard Horne, who had a previous summer's experience in an adjacent area, and was patient and helpful with his comments and advice. The author had meetings with Sandra Barr, Rebecca Jamieson, Dave McMullin, Rob Raeside and Paul Smith and thanks them for interesting and insightful discussions. The maps of Barr, Raeside, Jamieson and their numerous co-workers and students were used extensively while doing the field work. Reviews by D. J. Kontak, M. A. MacDonald and J. D. Keppie greatly improved the manuscript. I thank Kathy Mills for editing the report, Barb MacDonald and Susan Saunders for their work with the table and the final manuscript and Joe Campbell and his cartographic staff of the Nova Scotia Department of Natural Resources for drafting the figures. The project was funded by the Nova Scotia Department of Natural Resources under the Canada-Nova Scotia Cooperation Agreement on Mineral Development 1990-1992.
