Tips for Using the ArcIMS site

Selecting a Location or Area

To zoom in to an area, select   from the tool bar on the left and drag a box around the area of interest.

Data Layers

When an area is zoomed in, available data layers are shown on the right. A layer can be made active or inactive by checking or unchecking the visible box beside the layer. In order to view the selected changes, use the *Refresh Map*.

Refresh Map

Information from Data

To view information on a wetland, use the *Identity Tool*   to select the wetland.

When a wetland is selected with the Identity Tool, the following information is provided

Wetlands

Rec	Area	Perimeter	Hectares	Wetland Type	Vegetation Community 1	Vegetation Community 2	Vegetation Community 3
1	751418.74403	9749.85587	75.14	Bog or Fen	Treed	Lichen	Low Shrub

Only one layer can be active at a time, and, information about the active layer is provided.

Legend

To view the legend for the active layer, select the *Toggle Between Legend and Layer List* from the tool bar. This enables the user to move back and forth between the list of layers and the legend.
