

## Organization of the Manuals

To complete the Nova Scotia Department of Environment and Labour exam to obtain a Class IV Mosquito and Biting Fly Certificate of Qualification, it is advisable to have the following two training manuals:

- the General Pesticide Safety Manual
- the Mosquito and Biting Fly training module.

The General Pesticide Safety Manual and the Mosquito and Biting Fly module have been divided into sections, each with learning objectives, text, exercises and review questions.

The Mosquito and Biting Fly certificate authorizes the use by ground of insecticides for control of mosquito or black fly larvae or their adult stage.
