

ON-SITE SEWAGE DISPOSAL SYSTEMS

TECHNICAL GUIDELINES

Department of Environment
Environmental Monitoring and Compliance Division

Central Region

*Nova Scotia Environment
Central Regional Office
Suite 115
30 Damascus Road
Bedford, NS B4A 0C1*

Ph: 424-7773
Fax: 424-0597

*Halifax & Hants County
Applications*

Northern Region

*Nova Scotia Environment
Northern Regional Office
36 Inglis Place, 2nd Floor
PO Box 824
Truro, NS B2N 5G6*

Ph: 893-5880
Fax: 893-0282

Colchester County Applications

*Nova Scotia Environment
Amherst District Office
71 East Victoria Street
Amherst, NS B4H 1X7*

Ph: 667-6205
Fax: 667-6214

Cumberland County Applications

*Nova Scotia Environment
Pictou District Office (Granton)
20 Pumphouse Road
Middle River Pumping Station
RR#3
New Glasgow, NS B2H 5C6*

Ph: 396-4194
Fax: 396-4765

Pictou County Applications

*Nova Scotia Environment
Antigonish District Office
155 Main Street
Suite 205
Antigonish, NS B2G 2B6*

Ph: 863-7389
Fax: 863-7411

*Antigonish & Guysborough
County Applications*

Eastern Region

*Nova Scotia Environment
Eastern Regional Office
1030 Upper Prince Street, Suite 2
Sydney, NS B1P 6H7*

Ph: 563-2100
Fax: 563-2387

*Cape Breton & Victoria County
Applications*

*Nova Scotia Environment
Port Hawkesbury District Office
Suite 12
218 MacSween Street
Port Hawkesbury, NS B9A 3J9*

Ph: 625-0791
Fax: 625-3722

*Richmond and Inverness County
Applications*

Western Region

*Nova Scotia Environment
Western Regional Office
2nd Floor
136 Exhibition St.
Kentville, NS B4N 4E5*

Ph: 679-6086
Fax: 679-6186

*Annapolis & Kings County
Applications*

*Nova Scotia Environment
Bridgewater District Office
60 Logan Road.
Bridgewater, NS B4V 3J8*

Ph: 543-4685
Fax: 527-5480

*Lunenburg & Queens County
Applications*

*Nova Scotia Environment
Yarmouth District Office
13 First St.
Yarmouth, NS B5A 1S9*

Ph: 742-8985
Fax: 742-7796

*Yarmouth, Digby & Shelburne
County Applications*

On-site Sewage Disposal Systems Technical Guidelines

Nova Scotia Environment

Approval Date: June 5th 2013

Effective Date: June 5th 2013

Approved By: Darlene Fenton, Executive Director, Science Division

Version Control: Replaces *On-site Sewage Disposal Systems Technical Guidelines* dated April 2009.

Date: June 5th 2013

A handwritten signature of Darlene Fenton in black ink, placed over a horizontal line.

Darlene Fenton, Executive Director
Science Division

TABLE OF CONTENTS

1	INTRODUCTION	1
1.1	Purpose of the Guidelines	1
1.2	Content of the Guidelines.....	1
1.3	Introduction to On-site Systems	2
1.4	Care of On-site Systems	9
1.4.1	What Should Not Go Down the Drain	9
1.4.2	Water Use and Conservation.....	11
1.4.3	Maintenance	11
1.4.4	Access, Protection and Other System Features	12
2	SITE ASSESSMENT	14
1.5	Introduction	14
2.2.	Approval Procedures	14
2.3	Site Assessment Reports	17
2.4	Basic Considerations in Site Assessment.....	17
2.4.1	Slopes	17
2.4.2	Bedrock	18
2.4.3	Changes in Grade	18
2.4.4	Watercourses and Wetlands	18
2.4.5	Traffic Areas	18
2.4.6	Type of Natural Vegetation.....	18
2.4.7	Well Locations	19
2.5	Soil Assessment.....	19
2.5.1	Soil Assessment Methods.....	19
2.5.1.a	Test Pits	19
2.5.1.b	In-situ Permeability Tests.....	20
2.5.2	Soil Types.....	20
2.5.3	Soil Properties	23
2.5.3.a	Texture	24
2.5.3.b	Structure	24
2.5.3.c	Colour.....	24
2.5.3.d	Density	24
2.5.3.e	Depth	25
2.5.4	Effective Soil Depth	25
2.6	Determination of System Usage.....	27
2.7	Minimum Lot Area and Width Requirements.....	28
2.8	Separation Distances	30
2.8.1	Horizontal Separation.....	30
2.8.1.a	Protected Water Supply.....	30
2.8.1.b	Right of Way	30
2.8.2	Vertical Separation.....	31
2.9	Replacing A Malfunctioning System	34
3	SYSTEM COMPONENTS	35
3.1	Septic Tanks, Holding Tanks and Pump or Siphon Chambers	35
3.1.1	Septic Tanks	36

3.1.2 Holding Tanks	37
3.1.3 Pump and Siphon Chambers	39
3.2 Building Sewers and Effluent Lines	42
3.3 Distribution System	42
3.3.1 Crushed Rock or Gravel	42
3.3.2 Imported Sand Fill	42
3.3.3 Filter Sand and Sloping Sand Filter Material	42
3.3.4 Safety Considerations for Use of Recycled Crushed Glass	43
3.3.5 Barrier Material	43
3.4 Effluent Distribution Pipe	43
3.4.1 General	43
3.4.2 Gravity Distribution Pipes	44
3.4.3 Pipe Used In A Pressurized System	44
3.5 Pumps and Siphons	45
3.5.1 General	45
3.5.1.a Hydraulic Characteristics	45
3.5.2 Pumps and Controls	50
3.5.3 Mechanical-Electrical System	50
3.5.4 Siphon Operations	50
3.5.4.a Standard Siphon Operation	50
3.5.4.b Other Adopted Siphon Operation.....	52
3.6 Interceptors	53
3.6.1 Interceptor Trench	53
3.6.2 Interceptor Swale	54
3.7 Grease Chambers	55
3.8 Final Cover Material	56
3.9 Approved Products	57
3.10 Alternative/Innovative On-site Sewage Treatment Technologies	57
 4 SELECTION OF DISPOSAL FIELDS	61
4.1 Introduction	61
4.2 What Disposal Fields Do	62
4.3 Types of On-site Disposal Fields	63
4.4 Disposal Field Selection	65
4.4.1 General Considerations	65
4.4.2 Required Information	66
4.4.3 Preliminary Selection of Disposal Fields	66
4.4.4 Limiting Slopes	67
4.5 C1 Contour Trench	68
4.5.1 Introduction	68
4.5.2 Depth Limitations for a C1 Contour Trench	68
4.5.3 Layout of a C1 Trench	69
4.5.4 Selecting a C1 Contour Trench	69
4.6 C2 Contour Trench	72
4.6.1 Introduction	72
4.6.2 Layout of C2 Trench	72
4.6.2.a Layout of Standard C2 Trench	72
4.6.2.b Layout of Raised C2 Trench	73
4.6.3 Buffers	73

4.6.4	Interceptor	76
4.6.5	Selection of a C2 Trench	76
4.7	C3 Contour Trench	78
4.7.1	Introduction	78
4.7.2	Layout of a C3 Trench	78
4.7.3	Interceptor	78
4.7.4	Selection of a C3 Trench	78
4.8	Mound System Selection	82
4.8.1	Introduction	82
4.8.2	Layout of Mound Systems	82
4.8.3	Interceptors	82
4.8.4	Selection of a Mound System	83
4.9	Area Bed and Multiple Trench Systems	85
4.9.1	Introduction	85
4.9.2	Selection and Layout of an Area Bed	85
4.9.3	Selection and Layout of a Multiple Trench	86
4.10	Holding Tanks	94
4.10.1	Typical Requirements of a Holding Tank System.....	96
4.11	Pit and Vault Privy Selection	96
4.11.1	Introduction	96
4.11.2	Vault Privy	97
4.11.3	Pit Privy	97
5	DISPOSAL FIELD DESIGN	100
5.1	General	100
5.2	Design Principles	101
5.2.1	Lateral Flow	101
5.2.2	Vertical Flow	103
5.3	Lot Limitations	104
5.3.1	Slope Limitations	104
5.3.2	Construction on Filled Lots	104
5.4	Design of C1 Systems	105
5.5	Design of C2 Systems	107
5.6	Design of C3 Systems	110
5.7	Design of Mound Systems	112
5.8	Design of Area Bed and Multiple Trench Systems	114
5.8.1	General	114
5.8.2	Area Bed Systems	114
5.8.3	Multiple Trench Systems	116
5.9	Sloping Sand Filter	117
5.9.1	General Requirements	117
5.9.2	Use of Sloping Sand Filter as a Replacement for a Malfunctioning System	119
5.9.3	Use of Sloping Sand Filter on Lots Created Prior to August 6, 1984	120
5.9.4	Use of Sloping Sand Filter on Lots Created On or After August 6, 1984	121
5.10	Septic Tank and Grease Chamber Design Summaries	126
5.11	Other Approved Technology	127
5.12	Other Systems	128
5.12.1	Greywater	128
5.13	Cluster Systems	128

5.13.1	Definitions	128
5.13.2	Application	129
5.13.3	Minimum Requirements for All Cluster Systems or The Creation of a Lot to Be Serviced by a Cluster System	129
5.13.4	Cluster to Service Buildings, Structures, or Dwellings Located on an Existing Lot	130
5.13.5	The Construction, Installation or Creation of More than One System On a Lot Where at Least One of the Systems Is a Cluster System	131
5.13.6	Cluster for Municipal Development	131
5.13.7	Cluster for Condominium Development	131
5.13.8	Minimum Lot Requirements for Cluster Systems	132
5.13.9	Municipal Wastewater Management District By-Law Option	132
6	SYSTEM CONSTRUCTION	133
6.1	Introduction	133
6.2	Elevations	133
6.3	Septic Tanks	134
6.4	Water Tightness Testing for Septic Tanks, Holding Tanks and Siphon/Pump Chambers	134
6.5	Soil Damage During Construction	135
6.6	C1 and C2 Systems	136
6.7	C3 Systems	138
6.8	C3 Systems on Uneven Surface Lots	139
6.9	Mound Systems	139
6.10	Area and Multiple Trench Systems	140
6.11	Sloping Sand Filters	142
6.12	Interceptors	142
6.13	Pipe Protection	143
7	ON-SITE SEWAGE DISPOSAL SYSTEM REPAIR AND REHABILITATION	144
7.1	General	144
7.2	Malfunction causes	144
7.2.1	Hydraulic overload	144
7.2.2	Under Design/Poor Construction	145
7.2.3	Physical Damage	145
7.2.4	Lack of Maintenance	145
7.3	Trouble Shooting Procedure	145
7.4	The Failure Analysis for Trouble Shooting Septic Systems	149
8	SEPTIC TANK CLEANERS	155
8.1	General	155
8.2	Repair/Cleaning Operations	155
8.2.1	Pump, Repair or Modify a Septic Tank, Holding Tank or Vault Privy (Pumper)	155
8.2.2	Cleaning Systems Using Pressurized Air or Water (Flusher)	155
8.2.3	Assisting a Septic Tank Cleaner	156
8.2.4	Additional Requirements	156

LIST OF TABLES

Table 1.1	DO'S and DON'T'S in the use of an on-site system	10
Table 2.1	A guide to approximate soil permeabilities.....	23 & 102
Table 2.2	Textural properties of mineral soils, feeling and appearance.....	26
Table 2.3	Daily flows	27
Table 2.4	Minimum lot size requirements for development utilizing on-site sewage disposal systems	28
Table 2.5A	Minimum horizontal clearance distances required in on-site sewage disposal system regulations	32
Table 2.5B	Minimum horizontal clearance distances that should be maintained where possible	33
Table 3.1	Minimum capacity of septic tanks for dwellings	36
Table 3.2	Siphons and pumps - dosing and chamber capacity.....	50
Table 3.3	Maximum vertical hydraulic loading of treated sewage effluent.....	59
Table 4.1	Information needed to select a disposal field	66
Table 4.2	Disposal system selection options.....	67
Table 4.3	Minimum and Maximum Slopes for Selection of Distribution Fields	67
Table 4.4A	C1 system selection (1000 l).....	Appendix J (J-2)
Table 4.4B	C1 system selection (1500 l).....	Appendix J (J-3)
Table 4.5A	Raised C1 system selection (1000 l)	Appendix J (J-4)
Table 4.5B	Raised C1 system selection (1500 l)	Appendix J (J-5)
Table 4.6A	Standard C2 system selection (1000 l).....	Appendix J (J-6)
Table 4.6B	Standard C2 system selection (1500 l).....	Appendix J (J-7)
Table 4.7A	Imported Sand Fill Raised C2 system selection (1000 l).....	Appendix J (J-8)
Table 4.7B	Imported Sand Fill Raised C2 system selection (1500 l).....	Appendix J (J-9)
Table 4.7	Filter Sand Raised C2 system selection (1000 l)	Appendix J (J-10)
Table 4.7D	Filter Sand Raised C2 system selection (1500 l)	Appendix J (J-11)
Table 4.8A	Imported Sand Fill Raised C2 system selection for shallow soils.....	Appendix J (J-12)
Table 4.8B	Filter Sand Raised C2 system selection for shallow soils.....	Appendix J (J-12)
Table 4.9	C3 and Mound Selection (pipe length, hole spacing & sand specification).....	Appendix J (J-13)
Table 4.10 (A) & (B)	Multiple Trench selection (minimum area & cross section)	Appendix J (J-14)
Table 4.11 (A) & (B)	Area Bed selection (Minimum area & cross section)	Appendix J (J-15)
Table 4.12	Determination of disposal field widths	Appendix K
Table 4.13	Holding Tank Selection - storage times (days)	Appendix J (J-16)
Table 5.1	Maximum Hydraulic loading rates for Area Beds	116
Table 5.2	Maximum Hydraulic loading rates for Multiple Trench systems	116
Table 5.3	Maximum Hydraulic loading rates for Sloping Sand Filter Basal Area	118
Table 7.1	Repair options	151

LIST OF FIGURES (The following figures are **not to scale**)

Figure 1.A	Typical on-site sewage disposal system.....	4
Figure 1.B	Interceptor trench and swale	5
Figure 1.C	Typical contour system cross section.....	6, 7, 8
Figure 1.D	Effluent filter	13
Figure 2.A	Test pit	22
Figure 2.B	Building lot width	29
Figure 3.A	Septic tank	38
Figure 3.B	Holding tank	40
Figure 3.C	Pump installation	41
Figure 3.D	Gravity/pressure fed distribution pipe	47
Figure 3.E	Siphon	48
Figure 3.F	Siphon installation	49
Figure 3.G	Grease chamber	57
Figure 4.A	Disposal field components	64
Figure 4.B	Fully trenched C1 and Raised C1	70
Figure 4.C	Standard C2 contour disposal field	74
Figure 4.D	Raised C2 disposal field	75
Figure 4.E	C3 contour disposal field	79
Figure 4.F	Modified C3 for uneven surface lot	80
Figure 4.G	Mound disposal field	84
Figure 4.H	Fully Trenched Area Bed	88

APPENDICES

APPENDIX A - REFERENCES

APPENDIX B - SIMPLIFIED FALLING HEAD PERMEAMETER TEST FOR IMPORTED SAND FILL

Simplified falling head permeameter test for imported sand fill	B-1
Figure B1 Falling head permeameter apparatus.....	B-2
Figure B2 Falling head permeameter permeability chart.....	B-3

**APPENDIX C - MEASUREMENT OF HYDRAULIC CONDUCTIVITY OF SOILS
IN-SITU**

In-situ measurement of field-saturated soil hydraulic conductivity.....	C-1
References	C-4
Figure 2C Pask in - situ permeameter	C-6
Pask in situ permeameter operating instructions.....	C-7
Calculation summary for determining K_{fs}	C-7
Example problem for calculation of K_{fs}	C-9
Additional Comments	C-10

APPENDIX D - WATER MOVEMENT THROUGH SOILS

Water movement through soil	D-1
-----------------------------------	-----

APPENDIX E - SELECTION EXAMPLES

Selection example - C1	E-1
Selection example - C2	E-7
Selection example – Mound	E-11
Selection examples - C3	E-14
Selection examples - Area Bed and Multiple Trench	E-17

APPENDIX F - FLOW TABLES

General	F-1
Institutional	F-4
Medical/personal care	F-4
Schools	F-5
Prison	F-6
Food service	F-6
Commercial	F-8
Commercial shopping	F-9
Commercial automobile	F-10
Commercial	F-10
Industrial/office	F-11
Recreational camping	F-12
Parks & beaches and picnic grounds	F-13
Country clubs	F-13
Recreation general	F-14
Recreation sport	F-15
Miscellaneous	F-16
Approximate flushing frequencies	F-16

APPENDIX G - CONVERSION TABLES

Conversion of guidelines numbers	G-1
Units conversion table	G-3

APPENDIX H -STANDARD SUBMISSION DOCUMENTS (INCLUDING STANDARD CROSS SECTIONS)

Submission Standards for Applications	H-2
Submission Checklist for Qualified Persons Level I - Professional Engineer	H-5
Submission Checklist for Qualified Persons Level II	H-6
Application For Approval	H-7
Application for Variance	H-12
Submission Standards for Holding Tank Applications.....	H-13
Holding Tank Sewage Management Program	H-15
Submission Standards for Final Inspections	H-16
Certificate Of Installation Form.....	H-19
Completion of Work Form for On-Site Sewage Disposal System - Installers	H-20
On-site Sewage Disposal System Completion - Three Day Notification	H-21
Septic System Flushing Report Form	H-22
Fully Trenched C1	H-23
Partially Trenched (Raised) C1	H-24
Standard C2	H-25
Raised C2	H-26
C3	H-27
C3 with Mantle	H-28
Modified C3 for Uneven Surface Lot	H-29
Mound	H-30
Mound with Mantle.....	H-31
Fully Trenched Area Bed	H-32
Partially Trenched Area Bed	H-33
At Grade Area Bed.....	H-34
Fully Trenched Multiple Trench	H-35
Shallow Multiple Trench.....	H-36
At Grade Multiple Trench.....	H-37
Holding Tank.....	H-38
Sloping Sand Filter - Malfunction Replacement Only.....	H-39
Sloping Sand Filter (With Discharge Pipe) - Malfunction Replacement Only.....	H-40
Sloping Sand Filter (With Disinfection) - Malfunction Replacement Only	H-41
Sloping Sand Filter (No Liner).....	H-42
Sloping Sand Filter (Liner)	H-43

APPENDIX I - PROCEDURES FOR ABANDONING SEPTIC TANK SYSTEMS

APPENDIX J - TABLES FOR SELECTING AN ON-SITE SEWAGE DISPOSAL SYSTEM

Standard C1, 1000 l/day, Table 4.4A	J-2
Standard C1, 1500 l/day, Table 4.4B	J-3
Raised C1, 1000 l/day, Table 4.5A	J-4
Raised C1, 1500 l/day, Table 4.5B	J-5
Standard C2, 1000 l/day, Table 4.6A	J-6
Standard C2, 1500 l/day, Table 4.6B	J-7
Raised C2, 1000 l/day, Imported Sand Fill Table 4.7A	J-8
Raised C2, 1500 l/day, Imported Sand Fill Table 4.7B	J-9

April 2013	ix
Raised C2, 1000 l/day, Filter Sand, Table 4.7C	J-10
Raised C2, 1500 l/day, Filter Sand, Table 4.7D	J-11
Raised C2, 0 to 149 mm of Permeable Soil, 1000 & 1500 l/day, Imported Sand Table 4.8A	J-12
Raised C2, 0 to 149 mm of Permeable Soil, 1000 & 1500 l/day, Filter Sand, Table 4.8B	J-12
C3 and Mound Selection (Pipe Length, Hole Spacing & Sand Specification), Table 4.9	J-13
Multiple Trench Selection, Table 4.10(A)	J-14
Multiple Trench - Minimum Area and Cross Slope Dimensions, Table 4.10(B)	J-14
Area Bed Selection, Table 4.11(A)	J-15
Area Bed - Minimum Area and Cross Slope Dimensions, Table 4.11(B)	J-15
Holding Tank System Selection - Storage Times (Days), Table 4.13	J-16

APPENDIX K - DETERMINATION OF DISPOSAL FIELD WIDTHS

Determination of disposal field widths in Metres For C1, C2, C3 and Mound Systems, Table 4.12	K-1
---	-----

APPENDIX L - APPROVED PRODUCTS

Approved Products.....	L-1
------------------------	-----
