

23.2 Trust Funds

Policy Statement

It is the policy of the Province of Nova Scotia to account for and report trust funds in the Public Accounts in compliance with Public Sector Accounting Board (PSAB) standards.

Definitions

GOVERNMENT REPORTING ENTITY

Should comprise the organizations that are controlled by the government. These include the Consolidated Fund (through which all receipts and disbursements of public money flow) and other organizations that are owned and/or controlled by the Province.

EXTERNAL RESTRICTIONS

Stipulations imposed by an agreement with an external party, or through legislation of another government, to specify the purpose or purposes for which resources are to be used.

Trust funds are typically endowment monies, often created on the death of a contributor, or are funds held temporarily to serve as security under a performance or reclamation bond. A donor will entrust the Minister of Finance to administer the funds based on their explicit restrictions.

Policy Objective

The objective of this policy is to explain what trust funds are and to describe their appropriate accounting treatment.

Application

This policy applies to all trust funds as defined by this policy that are administered by any government department, agency, board or commission of the Consolidated Fund and by other members of the government reporting entity.

Policy Directives

The involvement by the Province with trust funds is very limited, acting as trustee to administer the funds only. The involvement by the Province typically includes holding the funds in a separate bank account, investing excess funds when available, and disbursing funds in accordance with the trust indenture or other similar enabling documents.

PROCESS AND PROCEDURES

Trust fund monies reside with the Department of Finance and are managed through Liability Management and Treasury Services (LMTS). Each fund has its own bank account and resulting administrative procedures connected to it.

Once a trust fund has been created, Liability Management and Treasury Services will obtain a signing authority form (Appendix 23-E) and open a bank account.

ACCOUNTING FOR FUNDS

The Department of Finance is responsible for the administration, accounting and control over all trust funds on deposit with the Province.

LMTS opens a bank account and invests all excess funds. In cases where it is preferred that a cash balance be maintained (no investment) LMTS must be notified in writing. A continuity statement capturing the activity for the fiscal year will be prepared and reviewed by the appropriate departmental representative. The Department of Finance must maintain source records for all deposits into the fund and all expenditures out of the fund.

The Handbook requires consolidation of all entities which are controlled by the government. Control is determined on an individual basis and considers many factors. See 4.1 Government Reporting Entity for a full questionnaire to be used to assess if an entity should be considered to be part of the government reporting entity. Trust funds are not controlled by government and are therefore excluded from the government reporting entity. The total funds under administration by the Province are disclosed in Notes to the consolidated financial statements.

Policy Guidelines

BUDGETING AND FORECASTING

Trust funds are not part of the government reporting entity so have no financial impact on the revenues or expenses of the Consolidated Fund.

Government Accounting, Department of Finance is responsible for:

- Provide advice to departments in the creation and administration of funds
- Properly report trust funds in the Province's financial statements

Liability Management and Treasury Services, Department of Finance will manage the required bank accounts and invest excess funds.

Monitoring

Government Accounting will monitor the policy's implementation, performance and effectiveness.
